

THE PECAN ISLAND SPACEX COMMUNITY BRIEF

Clear facts. Plain language. Good questions for
our community.

YOU'RE INVITED

Friday, October 9, 2026

3:00 PM

Pecan Island Methodist Church

Next to the Fire Department

articles, speaker information, and the digital
handout.

THIS IS A COMMUNITY GUIDE — NOT AN OFFICIAL PROJECT DOCUMENT

We are not part of SpaceX or the State of Louisiana. Some details may
change.

TWO PEOPLE. TWO USEFUL VIEWS.

They are here to help us ask better questions.

They are not here to promise what will happen.

Mike Kloesel

MAYOR OF KAPLAN

Mike brings a nearby public-leader view. He can talk about how communities follow big changes and ask officials for answers.

Listen for:

What should people ask now? What should be decided in public?

Craig Grove

**BROKER / OWNER, GRT
REALTY**

Craig is a Brownsville broker. He has watched SpaceX bring new buyers, workers, and questions to his area.

Listen for:

What changed around Brownsville? What should Pecan Island not assume?

One important note about Craig

Craig speaks as a local market observer. He is not a SpaceX employee or project insider. His stories can help us think, but they cannot tell us exactly what will happen here.

KEEP THESE THREE LABELS IN MIND

What we know. What we do not know.

A project can be real without every detail being final.

ANNOUNCED

SpaceX says it plans a Louisiana site.

SpaceX and the state announced a proposed campus near Pecan Island. The state says construction is expected in 2027. A first launch is targeted as soon as 2029.

PROPOSED

Roads, a bridge, and a wharf are in an application.

A coastal-use application describes access roads, a bridge, wharves, and dredging. It is a request to agencies. It is not a final permit or final plan.

NOT SET

Many big details are still unknown.

We do not have a final road route, parcel map, launch schedule, utility plan, noise map, or answer for how any one property will be affected.

A quick fact check on acreage

Reuters reported the announced Louisiana site at about **125,000 acres**. We could not confirm the often-repeated 136,000-acre number. A large area does not mean all of it can or will be built on.

Plain-English rule

Do not treat a rumor, a drawing, or a permit application as a final promise. Look for the real document and the agency in charge.

Scan the code for official Louisiana updates.

WHAT IS IN A PERMIT APPLICATION

Some plans are on paper. They are not final yet.

A coastal-use application describes a heavy-haul road, a long bridge, wharves, work areas, and dredging. This tells us what may be studied. It does not mean the work is approved or ready to start.

Organizer-provided map image. It is not an official final engineering map.

The simple question

What road, bridge, and water work will affect our community—and where is the official document?

Highway 82

The state says DOTD is looking at routes, roads, bridges, traffic, and possible Highway 82 work. The final scope, cost, and responsibility have not been set yet.

What we do not have

We do not have a confirmed four-lane highway from I-10 to Pecan Island. We did not find an official plan that confirms the Rayne or Duson routes being discussed locally.

What to ask for

Ask for the road map, the permit status, the construction schedule, the traffic plan, and the emergency-access plan.

Remember

A route that is being talked about is not the same as a route that has been chosen.

LOOK FOR LESSONS, NOT A PERFECT MATCH

Brownsville can teach us. It cannot predict us.

Boca Chica is an existing Texas launch site. Pecan Island is a new Louisiana proposal. The places have things in common, but they are not the same.

WHAT MAY BE ALIKE

Coastal places have real limits.

- Roads, bridges, marshes, storms, and flood risk all matter.
- One small road can become a big problem if traffic or closures increase.
- Jobs and business activity can come with noise, construction, and pressure on local services.

WHAT MAY BE DIFFERENT

Pecan Island starts in a different place.

- Brownsville already has a launch site. Louisiana does not.
- Our homes, camps, businesses, roads, and marshes are different.
- More land on a map does not mean more easy building. Water, wetlands, roads, and services still matter.

Before you make a property choice, ask for the real documents.

Ask for maps, road plans, flood and wetland studies, utility plans, safety areas, and permit records. Do not make a big decision based only on a rumor, a social-media post, or a guess.

THE BIG QUESTION IS WHEN — AND HOW MANY

A large project can change daily life before it is finished.

Traffic, food, housing, services, and local roads can all feel pressure when many workers arrive at the same time.

OFFICIALLY ANNOUNCED

3,000 direct jobs over 10 years

SpaceX and Louisiana say the project will create more than 3,000 direct jobs. SpaceX says it plans to hire heavily from nearby communities. Louisiana also says the full site is expected to include employee housing.

COMMUNITY SCENARIO — NOT CONFIRMED

30,000–35,000 workers at peak construction

Leaders and local sources have discussed this possible peak. We could not find an official project document that confirms this number, the peak year, or how long the peak would last.

Texas Starbase Airstreams — user-supplied photo

Texas Starbase housing — user-supplied photo

What could this mean for Pecan Island?

If a large outside workforce arrives before places to stay can catch up, demand for rentals, RV sites, food, fuel, and services could rise. That is a planning question, not a promise that rents will rise by a certain amount or at a certain time.

WHEN?

Official sources say construction is expected in 2027 and a first launch is targeted as soon as 2029. There is no official public peak-workforce schedule.

WHAT ABOUT BUSES AND HOUSING?

Large Cameron Parish projects show that worker transportation can be organized at scale. SpaceX has not announced a Louisiana bus plan, housing count, or housing design.

KEATY REAL ESTATE

Tell us what you own.

You do not have to sell, rent, lease, or list your property. This is simply a way to start a conversation.

Who is Keaty Real Estate?

Keaty Real Estate is a Louisiana real estate brokerage started by Jim Keaty in 2004. The team works with homes, land, commercial property, investments, and relocation.

You can tell us about:

Land • a camp • a home • a rental • an RV site • business space • storage • a possible project

We can help you sort through questions and talk about choices. We cannot promise a buyer, a lease, a value, a project, or an approval.

PROPERTY OPPORTUNITY LIST

Private first step. No pressure.

Use this list to tell us what you own and what you might consider in the future. You stay in control.

Before you sign anything, ask questions.

Ask what the agreement means, what it costs, what you can say no to, and what choices you have. Real estate, insurance, legal, tax, and engineering questions are different questions. Get help from the right person.

Levi Kastner

KASTNER INSURANCE GROUP

Insurance Advisor | Owner

VIDEO SPONSOR

Thank you for helping this conversation reach more people.

Kastner Insurance Group is helping record this forum and share the video online after the event.

Planning to rent a camp or land? Build? Run a business?

Insurance questions may matter. Levi can help you understand what to ask about property, liability, flood, wind, tenants, contractors, or business use.

KEEP READING AFTER THE EVENT

Scan for the easy-to-read website, the full handout, and both community articles.

A final reminder

This guide is independent. It is not made by SpaceX, the State of Louisiana, DOTD, or a permitting agency. Information can change. Check official sources before making a major decision.

DO NOT RUSH. GET THE FACTS. KEEP YOUR CHOICES OPEN.
